## *EDUCATION*

The University of Alabama, Tuscaloosa, AL — GPA: 3.14/4.00
**Bachelor of Science in Mechanical Engineering** — Dec. 2027
Minor: Automotive

## *RELEVANT WORK EXPERIENCE*

**Mechanical Engineering Co-Op,** *Mercedes Benz US, International*
**Term 3 – Body Series Planning** — May-Aug. 2026

- Managed fleet of 140+ KUKA robots and assisted in developing robot orders in preparation for future projects.
- Created a VBA in Excel to automate the robot buyoff and handover process.
- Disassembled equipment and designated parts as reuse or spare to save over $400,000.

**Term 2 – Fügetechnik/Joining Body Department** — May-Aug. 2025

- Designed and implemented a web-based application aimed at improving control room operations.
- Used Ignition to connect to 250+ lineside PLCs, designed a visualization system to reduce the workload of the team members.
- Improved upon current processes within the control room, collaborating with multiple teams of 5+ in each part of the plant.

**Term 1 – Fügetechnik/Joining Body Department** — Aug.-Dec. 2024

- Implemented and standardized a digital preventative maintenance schedule, increasing TPM completion by approx. 36%, and playing a part in decreasing downtime by approx. 22% and increasing OEE by approx. 2.6% over the course of the term.
- Trained 100+ team members to use the tool, while collaborating with various departments across the plant.
- Gained experience with manufacturing technologies as well as mechanical maintenance for various joining equipment.

## *RELEVANT PROJECTS*

**Robotic Printing of Non-Planar Architected Thermoset Composites,** *Team Lead*, *The University of Alabama* — Aug. 2026-Present

- Collaborate with peers to develop a direct ink writing (DIW) system using a 6-axis robot and a pneumatic dispenser to print nonplanar, fiber-reinforced thermoset composites cured by Radical-Induced Cationic Frontal Polymerization (RICFP).
- Coordinate parallel materials and mechatronics subteams, working alongside PhD students to report to faculty advisors and the Engineered Materials group at Los Alamos National Laboratory.

## *LEADERSHIP EXPERIENCE AND EXTRACURRICULARS*

**Member,** *UA EcoCar, Propulsion, Controls, and Modeling Subteam* — Aug. 2026-Present

- Collaborate with peers to simulate and design propulsion controls for a 2026 Chevy Blazer SS

**Ambassador,** *The University of Alabama Engineering Career and Development Center* — Apr. 2026-Present

- Advise students on the co-op program at UA, interact with representatives of various companies around the country, and collaborate with the ECDC office to support students and co-op activities.

**Member,** *Theta Tau Professional Engineering Fraternity* — Aug. 2023-Present

- *Regent:* Elected as Regent of Mu Chapter. Oversaw day-to-day operations of the chapter and managed the Executive Council of 10 peers. Led regular chapter meetings of 70+ student members. Interacted with staff at the University of Alabama and the National Fraternity.
- *Marshal*: Elected to the Marshal position. Oversaw and guided the Bylaws, Risk Management, and Judiciary Committees. Communicated and coordinated planning and budgeting with Executive Council and the chapter as a whole.

**Member,** *Crimson Racing, Aerodynamics Sub Team* — Aug. 2023-Aug. 2026

- Collaborated with peers to manufacture aerodynamic surfaces for the student-built car.
- Participated in the manufacturing of carbon fiber and practiced the basics of aerodynamic surfaces.

**Eagle Scout,** *Troop 1134* — Aug. 2016-May 2023

- Managed 15+ people in building shelving for the St. Peter Chanel Catholic Church rectory garage.

## *WORK EXPERIENCE*

**Head Counselor,** *YMCA Camp High Harbour at Lake Allatoona* — May 2023-Jul. 2024

- Instructed two leadership development programs of 20+ campers ages 13-14, responsible for care and wellbeing.
